

## HEART NEWS LETTER

## Summer Vacation Parent Child Eikaiwa Class

In Saitama Prefecture, an English conversation class targeting all elementary students and their families was held. In all 3 days of the program, the participants were divided into elementary, junior high, and high school small groups so the ALT was able to teach according to teach level. Although the class lasted only two hours in 1 day, the children as well as their families were able to enjoy and happily participate in this program.

## Warming up (5 Step)

The class began with a song as a warm-up. The participants followed the rhythm and moved along with the Chants as they learned how to count.

## Directions Game

Using city maps created in class, the class played the Directions game. After learning vocabulary, they chose familiar places and used the new words to play the game with the ALT.

## Shopping Game

Using picture cards of money and objects, the ALT and students role-played as shopkeeper and customer in the Shopping Game.

"I was able to have fun and learn English at the same time"

"The ALT explained everything very carefully so I was able to understand"

Many participants gave comments like those above after participating in the class. Over the 3 days, the ALT was able to develop the program based on the students' understanding so they could participate. In the future, we hope to continue to make a significant contribution to foreign language activities like these.
